# Introduction

Astrology is both an art and a sacred science. There is hardly a science today which did not originate from astrology. In fact, astrologers laid the foundations of modern astronomy, chemistry, physics, medicine, psychology, mathematics among other disciplines.

It is important to understand that you are born with certain "themes", the timing and duration of which are both pre-destined. However, how you offset those themes is your free choice to a great extent. For example, you are supposed to experience sadness for an hour at a certain time of your life. You will definitely feel the sadness, but whether it is because of self-pity or due to your compassion for someone else is your free choice! Similarly, you may be born to be obsessed with anything you do, but the form of obsession is your free choice.

We have tried to give you an objective analysis of all your potential as well as your limitations. We have also tried to give examples of different people who were born with similar themes and hope you are able to gain deep insights in your inner temperament. After all, you are the only one who is actually going through your own experiences. We can only guide you in finding the best outlets and to realize your highest potential. We hope you enjoy your Personal Profile. It has been calculated using sophisticated astronomical formulae to ensure high accuracy. Below you will find a list of the zodiac positions of your natal planets along with the house cusps for your birth moment.

At the end of the report, you will find some dates for the future e.g.:

*Neptune Square Moon*

**Apr 10, 2013 1st Pass D**

**Aug 7, 2013 2nd Pass R**

**Feb 8, 2014 3rd Pass D**

In this case, it indicates that Neptune squares Oprah's Moon three times (each time making the same transit or *Pass*). It is moving forward or **D**irect then seems to go backwards or **R**etrograde then Direct again. The Pass indicates when the planet is making a transit to your natal planet (in this case Neptune squares Oprah's Moon three times or makes three passes). The D and R indicate Direct or Retrograde motion of the planet, which means in this case the Neptune squares her Moon 1<sup>st</sup> time on Apr 10, 2013, then 2<sup>nd</sup> time when it appears to be moving backwards (or Retrograde) on Aug 7, 2013 and then the last time on Feb 8, 2014 when it is Direct again.

**The last Pass is the most important** when everything seems to be moving forward again. Many times you may have found that some project starts, then stalls and then finally moves ahead. That is what the Passes indicate and when the trend seems to stall when the transiting planet is retrograde, then

## **Your Rising Sign**

First let's take a quick look at your ascendant, or rising sign, which gives an important clue to your temperament which shows up especially under stress. This is your personality which you project to others and also how you view yourself and the world in general. In fact, the sign on your First House cusp actually shows up more as your personality than your Sun sign unless of course they were both the same. In many horoscope magazines, they assume that your rising sign is the same as your Sun sign! So instead of looking for your Sun sign, if you just read the descriptions given for your rising sign, you will find it more accurate.

### ***Sagittarius Ascendant:***

You have a very open, independent and freedom loving nature. You attract others because of your philosophical wisdom and deep faith in the positive outcome of events. You are very broadminded and versatile but avoid getting involved with too many projects. You are outspoken and frank but avoid being tactless. Your positive attitude towards life will keep you youthful and alert throughout your life. Underneath your adventurous devil-may-care attitude, you are basically very responsible and may even be somewhat conservative, which will show up more later on in life.

Avoid taking on too many responsibilities and too many debts as they will restrict your need for freedom and independence. Although you want to learn everything in the minimum of time, you can be very focused and are interested in the application rather than just acquisition of theoretical knowledge. At some point, you will become involved with teaching, mass communication, positive motivation, religion, law, languages, import/export and foreign countries. Be careful of low back and kidney related problems.

### ***Your Ideal Partner***

Your ideal partner will be very bright and versatile who has an excellent sense of humor and provides constant intellectual stimulation. Communication is very important in a marriage and your partner also has to be very understanding and nurturing.

# Planet Aspects

## The Luminaries: Sun and the Moon

There are actually only eight planets, but in astrology, we interpret the Sun and Moon as if they were planets as well. This should not matter anyway because we are only concerned with the planets as being reflective of our inner state of mind. They have absolutely no physical bearing in astrology. For example, Pluto represents events which affect the masses and yet you would weigh less than a postage stamp if you were actually on that planet! What do the Planets Really Mean in Your Chart? Think of the planets as representing different sides of your nature. Mars is that side of you which wants action and fast results. Venus represents the artistic and luxury loving side of your nature.

### *The Sun: Your Basic Personality and Direction*

The Sun represents your basic goals, drives, motivation, temperament and your individuality. It also signifies your underlying personality traits which are unchanging throughout your life and its effects are more obvious later in life. In other words, people act more according to their Sun signs after the age of about forty. Sun rules the sign of Leo and corresponds to that part of your nature which relates to your personality and individuality. Its house placement is very important to find the areas where you will spend most of your energy. For example, Sun in the first house enhances your personality which will be your main asset. Sun in the ninth house will incline you towards foreign philosophies and travel. Similarly, Sun in the twelfth house is good for research.

**Key words:** Physical drive, energy level, ego and the physical heart. Personality traits. Areas of fame and recognition.

### *Sun in Aquarius*

Our birthday greetings to all of you who are Aquarians, one of the most brilliant, inventive but also eccentric signs of the Zodiac! Ruled by Uranus, those born under this sign have excellent ideas, but need someone else to make them work! They have strong humanitarian instincts and are usually very unbiased in the way they help others. Aquarius is an Air sign (even though its symbol is the Water Bearer!).

Aquarians can be coolly sarcastic, and because they are very intellectual, their wit can pass above people's head and afterwards hit them! In communication, they are usually very clear and precise like pilots. They are rational and objective but stubborn at the same time. They will listen to everyone, but you cannot change their mind unless you appeal to their reasoning ability. They make good friends but are better with groups sharing similar ideals than individual friendship.

Aquarians are often musical but need some Earth planets to make use of their genius. They are usually original but somewhat erratic in their artistic taste. They do well in marketing, media and advertising because of their conceptual ideas and communication skills.

In love, Aquarians can be cool and aloof. Yet these individuals are quite loyal and dependable in their steadfastness of love (unless they have Venus in Pisces). They can be unconventional both in their approach to love and also to who they are drawn to.

**Physiology:** The ankles and the Spine (parasympathetic nervous system).

**Public Figures:** Some of the people born under the sign of Aquarius are Abraham Lincoln, Ashton Kutcher, Burt Reynolds, Cristiano Ronaldo, Ellen DeGeneres, James Dean, Jennifer Aniston, John Travolta, Justin Timberlake, Matt Dillon, Mozart, Nicolas Sarkozy, Oprah Winfrey, Paris Hilton, Paul Newman, Phil Collins, Princess Caroline, Robbie Williams, Shakira, Tom Selleck, Wolfgang Amadeus Mozart.

## ***The Moon: Your Family, Emotional Reaction and Moods***

The Moon reflects your moods, feelings, your immediate reactions, imagination, emotional perception and your subconscious. Its effects are always of a short duration, unstable, fluctuating, changeable and more dramatic than the Sun's. Moon's influence is more obvious in the childhood as you tend to be more spontaneous. For example, a Leo person (Sun in Leo) will always have a certain dramatic and confident personality. Someone with Moon in Leo will show similar traits but only from time to time (in parties or if they are being ignored when they need attention). Someone with Moon in Aquarius will be cool and aloof when their feelings are hurt as opposed to an Aquarius person who is always like that. Moon rules the sign of Cancer and represents the emotional side of your nature and your initial reaction to different situations.

By transit, this means that both planets are susceptible to positive or adverse aspects. These individuals can expect a lot of ups and downs in life because you will have fantastic opportunities when both the planets are getting good aspects. However, when there is an adverse aspect, then you will experience conflicts reflective of both the planets at the same time. A lot depends on the type of planet involved and which planet is touching it off.

## **The Elements: Your Temperamental Balance**

## **Major Transits Happening Now**

"Transits" simply mean the continuous movement of the planets around the belt of the Zodiac as they relate to positions of the planets at the time o your birth. Transits represent the timing of different events in your life and their effects correspond to the nature of the transiting planet. However, it is important to recognize that the transits merely accurately reflect your experiences rather than actual events. In other words, the timing and the duration of your experiences are pre-destined, but how you offset them (the type of activity you chose to satisfy that experience) is your free choice! The slow moving planets are called Trend-setters and provide insights into the major trends of your life experiences. Here are the dates when the next major transits for the planets Jupiter, Saturn, Uranus, Neptune, and Pluto are exact in your chart. Some dates will have already passed and some are still to come. Remember, events do not happen on the exact day but the "theme" is in effect from a duration of weeks and sometimes even months before and after the exact day (depending on the planet involved).

In general, transits of Jupiter represent opportunities which may take from several days to a week or two to develop, while those of Saturn (restrictions and lesson of life) take from two weeks to a month to activate. Events relating to the transits of Uranus, Neptune and Pluto may take from a month to two months to develop. Uranus represents the need for change within yourself, Neptune stimulates the idealistic side of you and is excellent for inspirational type of work whereas Pluto indicates radical changes in your life which are beyond your control and require some kind of inner transformation on your part. Uranus, Neptune, and Pluto move so slowly that the experiences relating to their transits may take a year or two to evolve.

## **Landscape: Major Life Periods**

What follows amounts to a brief overview of the first thirty years or so of your life -- a road map of the years to come. Since childhood, adolescence, and early adult life are so crucial to each of us, an attempt has been made to describe these formative years. Based on the gradual movement of the planet Saturn, this is one of the most tested of all astrological techniques. It is used by almost every professional astrologer as part of any personal consultation. Provided that your time of birth is more or less accurate, you will find this information both accurate and informative. Here is a general life overview, followed by a close-up on your current changes -- what is happening right now. First the overview:

### **Your Personal Background**

Although your early years may be somewhat more difficult than average (say until the age of 14-15), you will more than make up for any late start by your outward reach and climb to success in your mid-teens. Puberty will bring a change of heart and direction aside from its expected effects. You will make very rapid progress in self-confidence and may well be a class or group leader in high school. Beyond that point, your career really takes hold. The age of 21-22 will find you coming to social and material prominence, and any career moves will build until roughly the age of 30. After this time, you should put more thought to consolidation and be less outward. You will begin to turn inward, and the years until you are 37-38 should be spent looking toward security and strengthening your position.

### **Your Current Situation**

Now for a close-up of recent years: while landscape was quite general, the dates given in this close-up should be much more precise. Life is composed of sections of time, each devoted to one kind of activity or another. We go along for a while in one direction until something changes within (or outside) us and we head off in a new course. Some of our earlier activities dry up and new ones spring up in their place. What follows is an analysis of the time period in which you find yourself now. Don't look here for a day-to-day account of life but rather to get a picture of this stretch of time, "these years."

*Saturn in 04th Quadrant*

**Nov 26, 2010 1st Pass D**

**Mar 31, 2011 2nd Pass R**

**Aug 20, 2011 3rd Pass D**

You are riding a high now in terms of taking advantage of the cycles in your life. This may well be a high-water mark; however, this is also the beginning of a series of years during which you should begin to consolidate and tie down the advances you have made in recent years. It may be best to begin to dig in and strengthen your current position rather than expand outward too much. You will find your mind beginning to turn away from the external (the material) and to be concerned with more inward and spiritual ideas. All of this will become clear over the next several years. This time marks a change of direction for you, away from the material and glitter, toward inner needs and security. You will find yourself more concerned with maintaining and strengthening your position, rather than pushing outward. In summary, a kind of high-water mark in the outward and social department. These years should be easy and filled with opportunities and friendships. Enjoy them. More demanding and inward years will be forthcoming a little further on down the road.
